TRENDS - A Look at the Latest Happenings in The Satellite Industry

Welcome To TRENDS – A regular feature of the SIA newsletter highlighting the latest trends in the satellite industry. This month's TRENDS comes from the desk of Jennifer Manner, senior vice president of regulatory affairs for EchoStar Corporation/Hughes Network Systems LLC and former executive committee chair of the Satellite Industry Association. In today's column, Ms. Manner discusses lessons learned and the increasing importance of broadband connectivity across the U.S. in the wake of a pandemic.

LOCKHEED MARTIN ANNOUNCES SUCCESSFUL LAUNCH OF THIRD GPS III SATELLITE THAT WILL PROVIDE NEXT-GENERATION SERVICES TO OVER 4 BILLION GLOBAL CUSTOMERS

On June 30th, Lockheed Martin announced that the third GPS III satellite SV03, was heading to orbit for on-orbit testing following a successful launch on board a Falcon 9 from Cape Canaveral (pictured above). After testing, the SV03 satellite is expected to join the GPS III satellites in orbit in providing positioning, navigation and timing signals for more than four billion military, civil and commercial users. The new GPS IIIs provide 3Xs better accuracy and up to 8Xs improved anti-jamming capabilities over any previous GPS satellites. They also offer a new L1C civil signal, which is compatible with other international global navigation satellite systems, like Europe's Galileo, to improve civilian user connectivity.
