TRENDS - Satellites and the Global Pandemic as the World Slowly Begins to Recover

This month's Trends column re-focuses on the continuing role that satellites, SIA industry members and space agencies around the world are playing in the fight against the pandemic. As the world slowly recovers, satellite companies are providing a host of communications, business continuity, broadcast, navigation, remote imaging and other vital services critical to public health and safety and community well being. Read the latest initiatives and updates on the SIA website page [HERE](#).

LOCKHEED MARTIN ANNOUNCES NEXT-GENERATION GPS III SV-05 SATELLITE HEADING FOR ORBIT FOLLOWING LAUNCH ON BOARD A SPACEX FALCON 9 FROM CAPE CANAVERAL

On June 17th, Lockheed Martin announced the fifth GPS III satellite (pictured above and left at a Lockheed Martin production facility), was heading to orbit approximately 12,500 miles above the Earth. Designed and built by Lockheed Martin, GPS III SV-05 is the latest GPS III next generation satellite that will be used by the U.S. Space Force and by billions of customers each day. It was launched on board a SpaceX Falcon 9 launch vehicle from Cape Canaveral, FL. (above, right) For more details on this and other SIA member stories, please visit the SIA Member News Page [HERE](#). (Photo credits: Lockheed Martin and SpaceX)

DROUGHT IMPACT - PLANET RELEASES IMAGE OF HOOVER DAM SHOWING HISTORIC LOW LEVELS OF LAKE MEAD

On June 21st, Planet released the above image of the Hoover Dam and Lake Mead dramatically showing the impacts of the ongoing drought. The drought in the U.S. has left the Dam's two emergency spillways high and dry. When this SkySat image was taken the spillways were about 124 feet above the surface of Lake Mead, which is now lower than at any other time since the reservoir was filled in the late 1930s. (Photo credit: Image courtesy of Planet and SkySat)
