- **Viasat** Broadband Supports NASA Research of 2024 Solar Eclipse
- **Viasat** Showcases New London and Focus on Innovation and Scaling Execution

On Apr 9th, the Delta launch program, spanning 60 years, came to a close with the lift-off of the final Delta IV Heavy rocket by **ULA** from SLC-37, at the Cape Canaveral Space Force Station. The launch vehicle, carried the National Reconnaissance Office's NROL-70 satellite and the mission initiated the future of heavy lift on ULA's next generation Vulcan rocket. (Photo Credit: ULA)

On Apr 8th, **HawkEye 360 Inc.**, announced it had successfully contacted its Cluster 8 & 9 satellites after they were launched one day earlier, marking the company's first dual deployment into a mid-inclination orbit. The satellites strategic positioning enhances coverage over the world's busiest maritime traffic corridors. (Photo Credit: SpaceX)
