On June 25th, the GOES-U advanced weather satellite built by [Lockheed Martin](#) for NOAA launched from the Kennedy Space Center on a Falcon Heavy rocket. GOES-U successfully established ground communications and is generating power. It is the final spacecraft in NOAA's next-generation GEO GOES - R series of four satellites. Photo Credit: Lockheed Martin

On June 20th, [SES](#) announced its ASTRA IP satellite was successfully launched by a SpaceX Falcon 9 rocket from Cape Canaveral Space Force Station. The Ku-band GEO satellite will augment SES's prime TV neighborhood, delivering content for public and private broadcasters, sports and content owners across largest European TV markets. (Photo Credit: SES)

On June 5th, [ULA](#) announced the successful launch of the first crewed test flight of Boeing's Starliner spacecraft to the ISS with NASA astronauts Barry "Butch" Wilmore and Suni Williams. The launch from SLC-41 at Cape Canaveral Space Force Station was also the first human-rated flight of ULA's Atlas V launch vehicle. (Photo Credit: NASA/Joel Kowsky)
